PARUL WALKEY

New York, USA | +1 4106083317 | parulwalkey189@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Project Manager with 3 years of experience in project execution, team management, and supply chain, focused on technical project delivery, AI implementation, and product operations. Experienced in turning complex business problems into executable plans across AI-enabled products, industrial operations, and enterprise systems (SAP S/4HANA, SQL, Tableau, Advanced Excel).

SKILLS

- **Project & Technical Delivery**: Requirements Gathering, Milestone Planning, Dependency Management, Risk & Issue Tracking, Decision Logs, Stakeholder Communication, Agile/Kanban, SAFe, WBS, RACI, Cross-functional Collaboration, Product Discovery, JTBD, MVP Prioritization, Continuous Improvement, Kanban, Root Cause Analysis, Context Engineering, Structured Outputs, Agentic workflows
- **Data & Analytics**: SQL, Tableau, Power BI, Advanced Excel (Pivot Tables, VBA, Macros), Alteryx, KPI Reporting, Dashboards
- **Supply Chain & ERP**: SAP S/4HANA, Procurement Coordination, Purchase Order Processing, Inventory & Production Planning, Demand Planning, MRP, Supplier Performance, Management of Change, Process Improvement, Lean Six Sigma, DMAIC, 6S, Supplier Risk Analysis
- **Tools & Systems**: Jira, Notion, Confluence, Trello, Smartsheet, SharePoint, Azure Data Studio, MS Office Suite, Slack, Airtable, Monday.con, Github

PROFESSIONAL EXPERIENCE

MyEdMaster | ***Project Manager | AI Product Delivery*** **Sep 2026 - Present**

- Coordinate development of an AI-generated TV product from early-stage prototype toward market readiness, translating product objectives into structured development activities and milestones.
- Coordinate with the development team across priorities, dependencies, deliverables, and implementation to keep product goals aligned.
- Support project planning, milestone tracking, task prioritization, and follow-ups in Jira, maintaining visibility into progress and upcoming decisions.

Annie Guard (BWTech@UMBC) | ***Project Lead (Volunteer)*** **Jan 2025 - May 2025**

- Led a four-person cross-functional team through customer discovery, product definition, and execution for an AI-enabled sarcoma-detection venture, using Trello Kanban boards to manage timelines, deliverables, and dependencies, ultimately winning $5,000 in venture funding.
- Conducted 20+ user interviews and translated findings into documented requirements, workflows, and action plans that helped the team prioritize features.
- Developed the project charter, work breakdown structure, and Smartsheet schedule; maintained action items, risks, decisions, and documentation in Trello and SharePoint as a centralized repository that cut manual effort for the team.
- Introduced a RACI matrix to clarify ownership across workstreams, reducing role ambiguity and task confusion by approximately 50%, and improved execution cadence and task slippage through sprint planning.

LINDE LSAS | ***Operations Engineer*** **Oct 2022 - Jun 2024**

- Analyzed 10 years of historical demand for 6 products using Alteryx and Smartsheet, uncovering demand patterns that guided seasonal production and inventory planning for two manufacturing plants.
- Monitored inventory levels and material master records for 10 critical items in SAP, supporting MRP runs that maintained monthly material availability.
- Supported procurement workflows in SAP S/4HANA, including purchase-order processing, material coordination, vendor interactions, and GR/IR activities, coordinating with procurement and internal teams to prevent material-related execution delays.
- Adjusted shift-level production rates using demand-forecast models based on customer demand, inventory, storage capacity, and product availability, consistently maintaining safe stock levels and meeting supply requirements.
- Managed outbound product fulfillment by coordinating inventory allocation, product-quality checks, and dispatch readiness to support on-time deliveries.
- Automated biweekly procurement and change-order reporting using Excel VBA and macros, preserving Management of Change data integrity while reducing reporting time by 66%.
- Built Advanced Excel dashboards tracking production, inventory, material usage, and customer-supply KPIs, improving operational visibility by 50% and supporting faster planning decisions.

PROJECTS

Supplier Intelligence Copilot | AI-Assisted Supply Chain Decision Support | Product

- Evolved a SQL/Tableau supply-chain dashboard into an AI-assisted prototype analyzing supplier quality, delivery, lead-time, inventory, and SKU-risk signals to help analysts identify supplier risks and prioritize investigations.
- Designed the workflow so supplier risk classification and operational metrics remain deterministic, while the LLM summarizes findings, explains key risk drivers, highlights healthy signals, and suggests follow-up actions, engineered by structured outputs, and human-in-the-loop guardrails to ground AI recommendations.

Inventory & Supply Chain Health Monitor | SQL, Tableau, Supply Chain Analytics | Tableau Dashboard

- Developed an end-to-end analytics dashboard covering 100 SKUs across 5 suppliers, integrating inventory, supplier quality, lead-time, and product-risk indicators to monitor supply-chain health.
- Built KPI views for supplier defect rates, inspection pass rates, lead-time deviation, inventory health, and high-risk SKU exposure, enabling supplier- and SKU-level exception analysis.

ChatGPT Projects - Product Teardown | Product Analysis & Strategy | Notion Analysis

- Analyzed the difficulty of resuming long-running work in ChatGPT Projects and proposed a Project State experience covering decisions, open questions, constraints, and supporting sources, with experiment design and user control built in.

EDUCATION

University of Maryland, Baltimore County (UMBC) **Aug 2024 - May 2026**
MS, Engineering Management, Minor Certificate in Project Management *Baltimore, MD*

CERTIFICATIONS

- Certified Associate in Project Management (CAPM): PMI
- Google Project Management Certificate
- Lean Six Sigma Green Belt: CSSC
- Google AI Essentials: Coursera
